MWPCA

MWPCA PRESIDENT'S MESSAGE - Charles Tyler

Charles Tyler
MWPCA President

Greetings and Happy New Year! It's hard for me to believe that it's 2009 - although by the time you read this, I'll be used to it, since we'll be 10% or more of our way around this lap on the track. With all of the turmoil in the financial markets, it's going to be a very daunting and interesting year, but the MWPCA appears ready to progress and flourish.

This year, we're working on some changes to the MWPCA routine. The June meeting - our western regional meeting - will include the opportunity to play a round of golf following the educational portion of the meeting. Details of that meeting will be forthcoming, but the plan is that the meeting will be at the Wyckoff Country Club in Holyoke (a stone's throw from our usual Log Cabin location), and the training meeting will be followed by a shotgun golf tournament, with included food and refreshments. Several of our members have suggested this as an added meeting offering, and we're responding with action. For the

record, the MWPCA has been for years the only one of the six New England operator associations without a golf outing sometime in the year. By hosting this round of golf, you might say that we're just trying to catch up with the rest of the region.

Another change will be in the venue of the September Trade Show. This year's show will be at the Wachusett Mountain Resort in Princeton, MA. Aside from being a trifle more central than the recent Westford location, the Wachusett location affords a change in scenery and the opportunity to change the format of the trade show just a bit. Stay tuned for details on the new location and the plans for positive changes in the show. It should be a refreshing and exciting move.

Although I'd like to take credit for innovation, these changes are mainly due to a shift in the membership of our Board of Directors. We have several recent additions to the Board who have come up with some great ideas for shoring up the vitality of the MWPCA, and who have followed through with them.

Another invigorating change this year will be the accession to the

AN OPERATOR'S EXPERIENCE - Craig Williams

If you are looking for new opportunities to see different water treatment facilities, meet great people and learn while enjoying yourself with other professionals with the same goals and interest, then you will be interested in the operator exchange program.

Like many of you who are reading this article, I was not really aware of all that is the Operator Exchange

Program. Last Spring, at the MWPCA Quarterly meeting in Westford, I heard the appeal for candidates to participate in the program. I thought that it sounded like a tremendous opportunity for someone but I didn't think it would be me, having only been a

member of MWPCA for a little over a half a dozen years and not being active on any committees. Certainly there have to be many others who would be in line ahead of me, most of whom would be much more deserving.

After encouragement from a co-worker I de-

CALLING ALL MEMBERS FOR NEW MWPCA COMMITTEE

- Ray Willis

Are you interested in joining a new committee?

The Board of Directors is considering the formation of a new MWPCA committee to focus on the sector of our profession that operates small scale wastewater treatment facilities throughout Massachusetts.

According to the MassDEP, there are approximately 250 facilities in Massachusetts with effluent discharges between 10,000 and 200,000 gallons per day. These facilities utilize over ten different treatment technologies, some with several different configurations. With such a range of systems, professionals who operate these facilities truly need to fit the label "jack of all trades."

The new committee will focus on the specific issues affecting professionals who operate smaller scale facilities and will promote this important

section of our industry. Some initial goals of the committee will include:

- To promote and recognize the operators of smaller scale facilities
- To promote/generate a training program geared towards the small-scale facility operator
- To advocate for the implementation of new operation rules, similar to 257 CMR 2.0, for the small scale facility operator
- To advocate for certification changes that would allow for small-scale facility operators to receive higher grade licenses
- To advocate changes in the operator testing program to include questions that relate to operations at small-scale, complex facilities

This is a perfect opportunity for members who have thought about joining a committee to step forward and become involved with a new committee.

"...new MWPCA committee to focus on the sector of our profession that operates small scale wastewater treatment facilities throughout Massachusetts."

Many of us believe that these "decentralized" facilities are the future of wastewater treatment in Massachusetts, and that there will be a need for more and more operators with these specific specialized skills and knowledge.

For those members interested in joining this committee or if you have any questions, please feel free to contact Directors Ray Willis (rwillis@onsite-eng.com 508-440-5470) or Mike Moreau (mmoreau@eosenvironmental.com).

Don't put it off - call today!!

We're experts with a precious resource.

Your budget.

Water is a vital resource.

But at EJP, we never forget about your bottom line. We're all about harnessing the power of water in a way that benefits both communities and the municipalities that serve them. That's why we offer water management solutions, technologies and **quality** products that assure cost-savings, **revenue** generation and water **conservation**. WATER, SEWER, DRAIN & STORM WATER SOLUTIONS

UPCOMING MARCH QUARTERLY MEETING IN WESTFORD

Join us on March 18th at the Westford Regency for the March Quarterly Meeting in Westford, Massachusetts. This one-day meeting will include the following presentations:

- A Review of the Massachusetts Water/Wastewater Agency Response Network (MA WARN) - Jim Controvich, Springfield Water & Sewer Commission
- Powering Your Plant with Renewable Energy - Ralph Dumke, Waterline Industries Corporation
- Update on Upper Blackstone WWTF Project - Georgine Grissop, CDM
- Operator Exchange Recap - Craig Williams

Westford Regency, Westford, MA.
Location for Quarterly Meeting on
March 18th

To register, please use the enclosed registration form. Registration deadline is March 13th. 2.5 TCHs will be awarded for operator recertification.

NEIWPCC TRAINING SEASON IS UNDERWAY - NEIWPCC

Visit www.neiwpcc.org/training to see a complete listing of courses. Two courses of particular interest are:

Optimizing Sequencing Batch Reactor (SBR) Performance, April 21, 2009, at the Falmouth WWTP. In this course, participants will receive instruction in the basic theory, design, and operation of SBRs. Instructors will present case studies that illustrate potential SBR problems and solutions.

Advanced Process Control, April 22 - 23, 2009, at the Brockton Public Library. Topics include microbiology of activated sludge, optimizing clarifier performance, troubleshooting the

activated sludge system, and achieving higher effluent standards. The program includes a hands-on exercise at the Brockton WWTP.

Onsite Courses

NEIWPCC is offering two onsite wastewater specific courses this spring 2009. The first is a six evening course that covers basic wastewater treatment and unit processes of onsite systems. This course was originally piloted last fall and is now a permanent part of our Mass. offerings. It is designed as a beginner course for operators in the onsite field to learn the basic operation and maintenance of small wastewater package plants. This six evening

course begins on Thursday, March 19 and runs until Thursday, April 23 and will be held in Millbury, MA. The second course is a Technical Seminar on approved Massachusetts Title 5 technologies and is geared towards the operation, maintenance, design, permitting and installations of approved Title 5 Technologies. This is the fourth of an ongoing series. This seminar will cover the RUCK system, the SeptiTech System, the JET Aerobic Wastewater Treatment System and the Advantex Treatment System. This course will be held on Thursday, May 14 at Bridgewater State College. Visit the NEIWPCC training page for more information.

Continued on Page 8

OPERATOR DAY

Over 25 operators participated in "Operator's Day" on Tuesday, January 27, 2009 during the New England Water Environment Association's (NEWEA) Annual Conference & Exhibit, January 25- 28, 2009 at the Boston Marriott Copley Place Hotel, Boston, MA.

The operators were treated to free admission and a wonderful buffet luncheon in Bello Mondo's restaurant on behalf of MWPCA.

Operators also took advantage of many technical sessions and visited over 175 vendor equipment displays.

JUNE MEETING OFFERS GOLF OPPORTUNITIES AND SPONSORSHIPS

Come join us on June 17th at the Wyckoff Country Club in Holyoke, Massachusetts for the quarterly meeting and eighteen holes of golf.

The Wyckoff Country Club offers a challenging 18-hole golf course with water hazards that come into play on five holes. The course rating is 68.5 and features 5,793 yards of golf from the longest tees for a par of 69.

The golf tournament will begin with a

shot-gun start after the conclusion of the quarterly meeting and lunch. Prizes will be awarded for best ball, closest to the hole, etc.

Golf sponsorships are also available. Have your company sponsor a golf hole or sand trap and help support MWPCA. Sponsoring companies will have their name displayed.

Wyckoff Country Club, Holyoke, MA

Those wishing to golf will need to fill out the golf registration form. The registration and sponsorship forms can be downloaded from

www.mwpc.org.

Please contact Dan Freitas at 508-990-7097 or by email: westislandchief@comcast.net with questions.

Golf Deadline is June 12th!

REMEMBER TO VOTE!

MWPCA Board of Director positions will be voted on prior to the June Meeting. Ballots will be mailed to the membership by mail.

Watch your mail! Please return ballots by April 17th

PRESIDENT'S MESSAGE *Continued*

Presidency of Mike Foisy from the Upper Blackstone Water Pollution Abatement District. Mike is an operator's operator - a shift worker at the UBWPAD who is proud of his profession and anxious to make a difference in the industry. Mike will be taking over after the June meeting, and I'll be stepping aside (to the relief of some people, I'm sure). Although I'll no longer be a voting officer on the Board of Directors, I'll continue to be an active member, trying to help out where I can - as I urge all of you to do as well. You don't have to be a Director or a chair; even if all you can contribute is an article to this newsletter (news about your plant, ideas for the future, an opinion article), that will be a great help. Maybe you're good at organizing or record keeping, or maybe you'd like to volunteer to help at the registration table at a meeting - if there's anything, however small, you think you might be able to contribute, just raise your hand or mention it to one of our Board members - we're all listed on the masthead of the newsletter, and we'll all welcome your input.

As my final term as MWPCA President winds down, I look back on two years of challenges that began with the final departure of the state DEP from its active participa-

tion in our association and, more painfully, the withdrawal of the state's direct support for our training programs. While it hasn't been easy, the MWPCA has survived, and our training program, while scaled back and altered, is still

chugging along. The Training Center (now renamed in memory of our old friend, Rick Alden) is still open, thanks mainly to the generosity and support of the Upper Blackstone WPAD. The state's support of the Wastewater Operator Certification program has also diminished, and in spite of repeated attempts, we have been unable to arrange a meeting with the DEP Commissioner to discuss the dangers of short-changing this important program. The professionalism of the industry is at stake, and we are toiling to keep the program responsive and meaningful - but without the willingness of the DEP to participate in a serious discussion of our concerns, we have a long struggle ahead.

In spite of these disappointments, we have reason for optimism. Our membership totals are slowly rising and, as mentioned above, new participation has changed the face of the Board of

Directors. New Directors like Mike Foisy of UBWPAD, Mike Moreau of EOS, Ray Willis of

- ✓ Challenges with DEP
- ✓ Membership numbers are rising
- ✓ New participation on board of directors

DECEMBER MEETING HIGHLIGHTS - Ray Willis

On December 10, 2008, the Massachusetts Water Pollution Control Association (MWPCA) held its Quarterly Meeting at the Holiday Inn in Taunton, MA. The Quarterly Meeting was well attended by the MWPCA membership resulting once again in a standing room only event.

Those in attendance were treated to three presentations regarding various wastewater topics as well as a documentary trailer related to the state of water and wastewater infrastructure in the United States.

The first presentation, entitled Identifying Manhole I/I Sources and Cost Effective Repair Methods, was given by Mr. Tim Moody of Cretex Specialty Products. Mr. Moody's presentation focused on the significant sources of inflow/infiltration (I/I) typically found in

conventional sewage collection systems. In general, the presentation provided information as well as photos/videos of how I/I can enter manhole structures and the many available options to address I/I. Information regarding various techniques and products available to address I/I at manhole structures can be found at www.cretexseals.com.

Speaker Jim Controvich, Springfield Water & Sewer Commission presents on MA WARN.

The second presentation topic of the meeting informed the audience about the Massachusetts Water/Wastewater Mutual Aid (MA WARN) program. Mr. Jim Controvich of the Springfield Water and Sewer Commission, provided an overview of the MA WARN program, when and how the program

is implemented, the inherent need for such a program, the associated benefits and participation eligibility. Mr. Controvich has long been an advocate of mutual aid, and his presentation extensively de-

tailed the elements of the Mutual Aid Agreement format and how the Agreement is implemented.

As discussed during the presentation, MA WARN is a community to community mutual aid system that provides services and/or equipment to repair/restore damaged infrastructure, whether water or wastewater related, caused by either natural or man made disasters. Under MA WARN, any public utility is allowed to voluntarily participate in the program. To participate in the program, a community would enter into a

Only standing room was available at the quarterly meeting in December.

NOMINATIONS DUE FOR MWPCA ELECTIONS - Charles Tyler

It's that time of year again – time to nominate deserving candidates to serve as Directors of the MWPCA.

The Board of Directors consists of 13 Directors; four Directors are elected each year to three-year terms, and each year one Director is appointed for a one-year term on a trial basis – to see if he/she likes it well enough to run for a three-year term.

Nominations must be received by mid-April. Election ballots will be mailed in late March and the membership will vote for three Director positions.

Would you like to be more involved in the MWPCA, or do you know someone else who would like to be more involved? Put your name or their name in for a Director position. Serving as a Director is work, but it can also be a lot of fun.

The time commitment is minimal. Board of Director Meetings take place after each Quarterly Meeting and five or six other times throughout the year. The majority of other business is conducted via email.

The MWPCA belongs to you as members.

Be sure it's serving you as you'd like to be served! Our Directors are operators, engineers, vendors, administrators – old-timers and newcomers - men and women who care about how the MWPCA conducts itself, and who want to make sure that good decisions are made to keep the association healthy and vital.

If you'd like to join the group and help drive the MWPCA bus, contact President Charles Tyler, Secretary/Treasurer John Connor, or any other

Director or officer as listed in the mast-head of this newsletter.

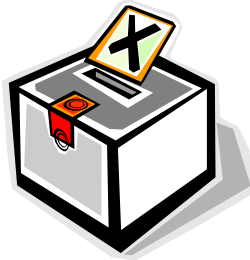

Even if you don't win, it's fun to get your name out there, and who knows – you may stand a chance of being appointed to the one-year trial term.

Just call or email and say, "I'd like to nominate (name of your choice) of (plant, firm, or other affiliation) for MWPCA Director."

And whether you nominate anyone or not, please watch for your ballot in the mail and VOTE - if we all participate, together we can all make a difference.

Nominations can be emailed or called in to: Charles Tyler at 617-660-7889 or charles.tyler@mwra.state.ma.us Please submit all nominations by mid-April.

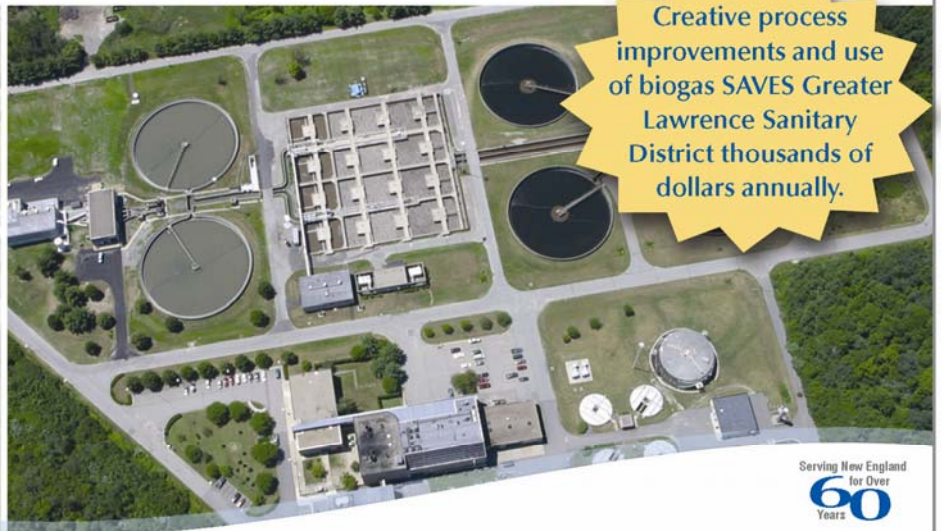

"Would you like to be more involved in the MWPCA...serving as a Director is work, but it can also can be a lot of fun."

FALL TRADE SHOW TO BE HELD AT WACHUSETT RESORT

The 2009 Fall Trade Show will be held at *Wachusett Mountain Resort in Princeton, MA.*

This new location will allow for a larger inside exhibitor area and an outdoor vendor demonstration area.

The show will continue to provide the

same great benefits as before, including: networking opportunities, TCH credits for operator recertification, raffle prizes, Norton t-shirt sales, awards presentations, and an optional luncheon.

Last year, over 150 operators and vendors participated in the trade show.

More details to follow.

So mark your calendar...

MARCH QUARTERLY MEETING TO DISCUSS RENEWABLE ENERGY - Henry Albro

What you can do now to start conserving or producing your own power at your facility?

Wind Turbine

The March 18th quarterly meeting presentation will include a discussion of alternative and renewable energy sources titled: **Powering Your Plant with Renewable Energy.**

The discussion will focus on the challenges concerning permitting, acquisition and installation? How does net metering affect you and your facility

KVAR energy converters

today and in the future? How will the new economic stimulus package help you? Topics will include wind turbines, solar panels and

Solar panels

KVAR Energy converters.

The Quarterly Meeting will take place on March 18, 2009 at the Westford Regency in Westford, Massachusetts. Use the enclosed registration form to register. Deadline is March 12th.

PRESIDENT'S MESSAGE - continued

Onsite Engineering, Dan Freitas of Fairhaven, and Eric Smith of FR Mahony have all made a difference in the discussion and in the direction of the MWPCA. As these new voices take over the discussion, they will need your help and support – and yes, your participation. It may be time for you to step forward and make your voice heard. The issues I've mentioned above (as well as numerous others) will not fix themselves, and your concerns and your interest in these problems are important. Whether you write, call, or attend a Board meeting (all members are welcome), the important thing is to make your voice heard. This is your association, and it can't work without you – so think about stepping forward just a little and helping it to work FOR you.

Thanks again for your attention and support. Good luck to us all in 2009!

Respectfully,

Charlie Tyler

MASSACHUSETTS AWARD WINNERS

Two operators from Massachusetts were recognized at NEWEA's Annual Conference Awards Luncheon in Boston on January 28, 2009. Anthony Olivadesa of Taunton was awarded the NEWEA Operator Award in recognition of excellence in plant operations, and Michael Burke of Holyoke was awarded the Alfred E. Peloquin Award in recognition of his service to the industry and his contributions to our professional associations.

NEWEA President Robert Cutone awards Anthony Olivadesa, City of Taunton with the Operator Award.

Michael Burke, Holyoke, MA WWTP receives the Peloquin Award from Robert Cutone, NEWEA President

NEIWPCC TRAINING continued

Certification Exams: The next wastewater certification exam will be held on Saturday, May 16, 2009. The application deadline is Wednesday, April 1, 2009. Information and applications can be found at www.neiwpcc.org/training/mwotexam.asp. Coming later this year, computer based certification exams. Watch our web site and www.mwpc.org for information.

A reminder to all certified operators - 2009 is a renewal year. All certified operators must have the required training hours and renew by December 31, 2009. Don't wait to the last minute to obtain your TCH requirement.

Donald Burford: In January of this year, we lost long-time instructor Don Burford. Don passed away on January 23, 2009. Don provided industrial waste training for a number of years both for MA DEP and NEIWPCC. He also taught drinking water courses for New England Water Works Association. In his many years of training, he had developed a faithful following. He will be missed.

Asset Management 101: Back to Basics for Small and Mid-Sized Utilities - A NEWEA Joint Asset Management and Small Community Committee Seminar, May 6, 2009, Concord, NH. This seminar will feature case studies that reveal what management issues are faced prior to and during the implementation of an asset management program, and the

benefits typically seen once such a program is in place. Emphasis will be placed on how the lessons learned from these case studies relate to EPA's *Handbook for Small Water Systems* and the corresponding five-step program. A final wrap-up discussion will summarize the basic concepts of asset management and successful implementation strategies, as well as identify the ways that typical challenges faced by small and mid-sized utilities can be overcome using the techniques presented in the seminar. For more information on this seminar, contact the NEWEA at (781) 939-0908 or visit the website at www.newea.org

Advanced Asset Management - A "Hands-On" Approach US EPA Asset Management Workshop, March 24 - 25, 2009, Hartford, CT - This two-day Advanced Asset Management Training was developed by USEPA for water and wastewater utility Chief Executive Officers and senior level personnel. Topic areas to be covered include an overview of fundamental concepts and core practices of asset management, determining the current state of utility assets, required "sustainable" level of service, critical assets, operations and maintenance, long-term funding strategy and building an initial asset management plan. For more information, go to www.neiwpcc.org/training/schedule.asp. You can register online at www.neiwpcc.org/conference/conference.asp

A NEW LOOK FOR MWPCA

Have you seen the new MWPCA booth?

If not, take a moment at the next quarterly meeting or trade show to check it out.

The board members have been working hard to develop materials and brochures to keep it stocked.

If you need a membership application, information on upcoming events, or another copy of the newsletter, MASS Waters - you can find it all there.

The new booth was graciously donated by Environmental Operating Solutions.

New MWPCA booth as displayed in January 2009.

OPERATOR EXCHANGE continued

cided, why not put my name into consideration. At the conclusion of the educational segment of the day's program, I approached Charlie Tyler and talked with him about my interest in the program, handed him my contact information and then left figuring I only had a slim chance of being selected.

In August, I received a phone call from Charlie telling me I had been selected as the exchange operator. To say I was surprised would be an understatement. I had for a brief moment, forgotten that I had even put my name into consideration. After confirming that I was still interested and able to participate, he told me that I would be the guest of the Maine WasteWater Control Association and that someone would be contacting me with details. Arthur Robinson, my host from Gardiner, Maine, contacted me a few days later.

I had been invited to participate in the 2008 Maine WasteWater Control Association Fall Convention at the Grand Summit Resort Hotel and Conference Center in Bethel, Maine.

I arrived at the Sunday River Grand Summit Hotel on Tuesday, September 23rd where I met Arthur and his boss Chuck Applebee, the President of the MWWCA, for dinner before we went on to meet the executive committee of the association. Wednesday, Arthur took me on a tour of three different treatment plants. We visited the Augusta Sanitary District, Kennebec Sanitary District and the Gardiner Sanitary District. On Thursday and Friday I attended the convention.

Gardiner Sanitary District Treatment Plant, Gardiner, ME

I was honored to be recognized at the awards lunch held on Thursday where I was presented with a few gifts to remind me of the hospitality that had been extended to me during my stay.

Every aspect of this event was positive. The hospitality of the men and women of the Maine WasteWater Control Association, the opportunity afforded by being selected by the Massachusetts Water Pollution Control

Association and the support of my employer in allowing me the time to attend is extremely appreciated. I am very proud and honored to have been this year's ambassador from Massachusetts. I feel that I certainly was afforded the opportunity to network with a diverse group of professionals in an environment that would not normally be available

to me. I encourage anyone who has not had this experience to pursue it; it is an experience that will never be forgotten.

"If you are looking for new opportunities to see different water treatment facilities, meet great people and learn while enjoying yourself with other professionals with the same goals and interest, then you will be interested in the operator exchange program."

'09 Operator Exchange - Participants Needed

If you are interested in participating in the Operator Exchange Program, please contact Gene Valliere at 508-790-6335 or by email: genev@capecod.net

The Operator Exchange Program is free and is an excellent opportunity to meet others in the wastewater field while having fun.

Does Your Collection System need a Stimulus? Sewer Anywhere and Save, Now!

E/One Sewer Systems can cut your sewer costs from 50 to 80 percent.

Unprecedented times demand unprecedented savings. Do you have rocky, hilly, wet or even extremely flat land where conventional gravity sewers are too expensive — or simply impossible to put in place? We can help you.

Environmentally Sensitive, Economically Sensible

With an E/One system, there's no need for massive gravity trenches, huge mains or costly lift stations. The E/One pressure sewer uses a small main in a shallow trench that follows the contour of the land making for a gentler environmental footprint.

It lets you sewer virtually anywhere. Including sites where old septic systems may be dying and polluting. With over 40 years of experience, E/One provides a highly reliable sewer solution with no preventive maintenance, and virtual transparency to the homeowner.

Let us prove it — free

Send us the topo map for your next project. We'll show you how an E/One system can make your project viable once again.

Call, or visit us online.

DECEMBER MEETING HIGHLIGHTS - continued

Mutual Aid Agreement with a neighboring community and/or community in close proximity. This Mutual Aid Agreement details the process and procedures to receive mutual aid and covers such issues related to requesting and giving assistance, community reimbursement, dispute resolution, and worker's compensation. The Mutual Aid Agreement, which serves as a contract between the communities, would have been negotiated and approved prior to receiving any goods and services related to an emergency situation. A complete summary of the MA WARN program can be found at www.mawarn.org.

Speaker Alan Slater, MassDEP gives a presentation on upcoming regulation changes.

The third presentation, given by Mr. Alan Slater, P.E. from the Massachusetts Department of Environmental Protection (MassDEP), was entitled Regulation Changes to the Ground Water Discharge Permit Program & Reclaimed Water Permit Program. The presentation by Mr. Slater detailed revisions to the Permit Procedures regulations (314 CMR 2.00), Ground Water Discharge Permit Program (314 CMR 5.00) and the Operation and Maintenance and Pretreatment Standards for Waste Water Treatment Works and Indirect Discharges (314 CMR 12.00).

Also, the changes to the MassDEP Permit Programs included the elimination of the Ground Water Quality Standards regulations (314 CMR 6.00) and the promulgation of new Wastewater Reuse Regulations (314 CMR 20.00).

Mike Foisy, Deborah LaVergne, Paul Caron and Sharon Lawson from Upper Blackstone WPAD pose for the camera before the luncheon begins.

As indicated by Mr. Slater, the proposed regulation changes are intended to streamline the approval process and combine several existing MassDEP policies together as regulations, while eliminating the need for some existing outdated regulations. These changes to the regulations will affect applicants, engineers, wastewater treatment plant operators, and treatment works owners. Overall, the changes to the regulations were implemented to effectively streamline permit applications, provide more emphasis on the hydrogeological evaluations at the beginning of the application process, create new categories that do not require a Ground Water Discharge Permit, provide a single regulation source for groundwater quality standards, provide regulations for wastewater reuse in lieu of a "policy", and to expand the MassDEP's enforcement capabilities against wastewater treatment plant operators. A complete listing of the proposed regulation changes and new regulation can be found at <http://www.mass.gov/dep/service/regulations/newregs.htm#proposed>.

The last presentation included a trailer for the Penn State University documentary regarding the state of water and sewer infrastructure in the United States. *Liquid Assets* is a 90-minute documentary to educate the public as well as local, state and federal officials of the current state of infrastructure throughout this country and the importance that water, wastewater, and stormwater infrastructure plays in our everyday life in protecting health and our economic growth. The *Liquid Assets* website also provides a *Community Toolkit*, which includes educational material and other resources as a means to invoke discussion at the local level about the need to construct, repair, maintain and replace water and wastewater infrastructure. Complete information regarding *Liquid Assets*, including dates of broadcasting, access to the Community Toolkit, and the trailer, can be found at <http://liquidassets.psu.edu/>.

The next quarterly meeting will be held at the Westford Regency on March 18th.

Attendees packed the room to hear a technical presentation by Tim Moody, Cretex Specialty Products on manhole repair.
